College of San Mateo 2014 - 2017

AS - Computer Information Science

Projects

MonaliMirel.com

Personal Website

My portfolio website that I designed and built from the ground up using HTML5, CSS3, Javascript, jQuery, PHP and some Bootstrap. It is built to serve as an online resume that contains links to projects I've worked on and provide a list of my skills and job experiences. It is built with a responsive layout that is also mobile-friendly.

MissionConst.com

Company Website

A company website consisting of four web pages that I designed and built from the ground up using HTML5, CSS3, Javascript, jQuery, and some Bootstrap. The website is responsive and is viewable in any devices. I regularly maintain and update the website according to my client's needs and preferences.
